DETAILED ACTION
RESPONSE TO ARGUMENTS

Response to Arguments

1. Applicant's arguments with respect to claims 1-9, 11-30, 32-46, 48-94 has been considered but is moot in view of the new ground(s) of restriction requirement.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-9, 11-30, 32-40 and 79-94, drawn to a method for processing images produced by medical diagnostic imaging system, classified in class 382, subclass 128.
- II. Claims 41-46, 48-78, drawn to a method for performing a comparative analysis of a plurality images, classified in class 382, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as comparative analysis of plurality of images. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2623

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
